

MANTLE
FOR A BETTER LIFE

*Live
The Life*

YOU WISH TO LIVE

Mantle Housing has grown from a group of families who have adult children living with persistent and enduring mental illnesses.

Mantle Housing, along with its partners, will build safe, affordable homes that will provide opportunities for residents to live the lives they wish to live with support as and when they need it.

www.mantle.org.au

The first village will consist of 14 private homes surrounded by green space. Wesley Mission Brisbane will be responsible for non-clinical support services staff who will provide a level of support determined by each resident according to their vision for their life in the community.

Persons who reside in the village will continue to be provided with mental health follow-up through a combination of public, private and non government organizations.

A full and productive life, with friendships, education and fulfilling work are aspirations many of us hold. A safe and stable home is the way to begin that journey.
